Roadmap and plans discussion

Scientific application goals:

- BBH/BNS/BHNS mergers
- CCSNe
- Accretion disks
- Beyond GR
- Self force
- CCM
- Circumbinaries

Methods and infrastructure:

- Neutrino scheme(s)
- Hydro scheme (curved meshes, constrained transport, +?)
- GPUs via Kokkos
- Integrate with BFI & catalog
- Improve usability

What do you want to see?
What are your concerns?
